

IDIS Mobile Plus

IDIS MOBILE+

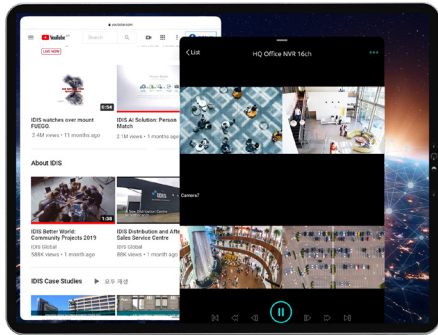

The IDIS Mobile Plus app integrates the existing IDIS app with IDIS Solution Suite mobile for improved and more powerful functionality. Users can remotely access cameras, NVRs, monitor live video streams, and search recorded video using an iPhone, iPad, Android phone or tablet anytime, anywhere.

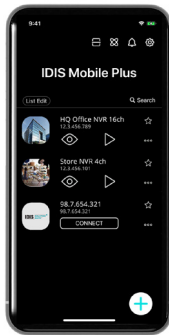

4K

4K Live Streaming, Search, and Playback

- Up to 4K live streaming video on mobile devices from remote locations
- High quality images in H.264/MJPEG and H.265 formats
- High performance and playback of recorded video

iPad split view

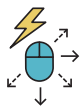

Dark mode

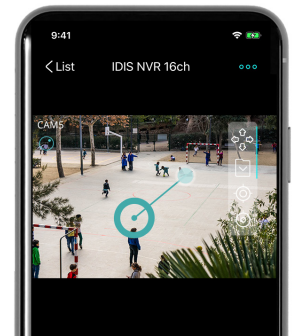

Various Viewing Modes

- Simultaneous 1/ 4 / 9 / 16 split screen live monitoring
- Enables up to 2 x 2 split screens for searching recorded video
- Supports iPad split view, dark mode, while users can choose portrait or landscape viewing options

Smart UX Controls

- Full pan, tilt, and zoom control of DirectIP and DirectCX cameras
- Calendar search, playback, and bookmark functions
- Simple drag and drop control to change size and position of the video
- Smooth and seamless controls in real-time with ground breaking accuracy by panning images by IDIS Fisheye Camera

Event Alarm Notification

- Configure and receive push alarms, event/time lapse queries, two-way audio, and image capture
- Supports a wide range of events including alarm-in, motion detection, trip zones, video loss, text-in, etc.

Languages and OS

- English, Russian, Japanese, and Korean language options
- Supports Apple iOS from version 11.0 and above and Android 5.0 (Lollipop, API Level 21) version
