# Before reading this manual

This manual contains basic instructions on installing and using Hybrid Network Video Recorder, an IDIS product. Users who are using this product for the first time, as well as users with experience using comparable products, must read this manual carefully before use and heed to the warnings and precautions contained herein while using the product. Safety warnings and precautions contained in this manual are intended to promote proper use of the product and thereby prevent accidents and property damage and must be followed at all times.

Once you have read this manual, keep it at an easily accessible location for future reference.

- The manufacturer will not be held responsible for any product damage resulting from the use of unauthorized parts and accessories or from the user's failure to comply with the instructions contained in this manual.
- It is recommended that first-time users of Hybrid Network Video Recorder and individuals who are not familiar with its use seek technical assistance from their retailer regarding product installation and use.
- If you need to disassemble the product for functionality expansion or repair purposes, you must contact your retailer and seek professional assistance.
- Both retailers and users should be aware that this product has been certified as being electromagnetically compatible for commercial use. If you have sold or purchased this product unintentionally, please replace with a consumer version.

## Safety Precautions

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

	IEC60417, No.5032	Alternating current
	IEC60417, No.5031	Direct current

## Important Safeguards

### 1. Read Instructions

All the safety and operating instructions should be read before the appliance is operated.

### 2. Retain Instructions

The safety and operating instructions should be retained for future reference.

### 3. Cleaning

Unplug this equipment from the wall outlet before cleaning it. Do not use liquid aerosol cleaners. Use a damp soft cloth for cleaning.

### 4. Attachments

Never add any attachments and/or equipment without the approval of the manufacturer as such additions may result in the risk of fire, electric shock or other personal injury.

### 5. Water and/or Moisture

Do not use this equipment near water or in contact with water.

### 6. Ventilation

Place this equipment only in an upright position. This equipment has an open-frame Switching Mode Power Supply (SMPs), which can cause a fire or electric shock if anything is inserted through the ventilation holes on the side of the equipment.

### 7. Accessories

Do not place this equipment on an unstable cart, stand or table. The equipment may fall, causing serious injury to a child or adult, and serious damage to the equipment. Wall or shelf mounting should follow the manufacturer's instructions, and should use a mounting kit approved by the manufacturer.

This equipment and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the equipment and cart combination to overturn.

### 8. Power Sources

This equipment should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power, please consult your equipment dealer or local power company.

You may want to install a UPS (Uninterruptible Power Supply) system for safe operation in order to prevent damage caused by an unexpected power stoppage. Any questions concerning UPS, consult your UPS retailer.

### 9. Power Cords

Operator or installer must remove power and TNT connections before handling the equipment.

### 10. Lightning

For added protection for this equipment during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent damage to the equipment due to lightning and power-line surges.

### 11. Overloading

Do not overload wall outlets and extension cords as this can result in the risk of fire or electric shock.

### 12. Objects and Liquids

Never push objects of any kind through openings of this equipment as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the equipment.

### 13. Servicing

Do not attempt to service this equipment yourself. Refer all servicing to qualified service personnel.

### 14. Damage requiring Service

Unplug this equipment from the wall outlet and refer servicing to qualified service personnel under the following conditions:

A. When the power-supply cord or the plug has been damaged.

B. If liquid is spilled, or objects have fallen into the equipment.

C. If the equipment has been exposed to rain or water.

D. If the equipment does not operate normally by following the operating instructions, adjust only those controls that are covered by the operating instructions as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the equipment to its normal operation.

E. If the equipment has been dropped, or the cabinet damaged.

F. When the equipment exhibits a distinct change in performance this indicates a need for service.

### 15. Replacement Parts

When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer or that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock or other hazards.

**16. Safety Check** Upon completion of any service or repairs to this equipment, ask the service technician to perform safety checks to determine that the equipment is in proper operating condition.

**17. Field Installation** This installation should be made by a qualified service person and should conform to all local codes.

### 18. Correct Batteries

Warning: Risk of explosion if battery is replaced by an incorrect type. Dispose of used batteries according to the instructions.

Do not dispose of a battery into fire or hot oven, or mechanically crushing or cutting of a battery, that can result in an explosion.

Do not leave a battery in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas.

Do not leave a battery in an extremely low air pressure that may result in an explosion or the leakage of flammable liquid or gas.

### 19. Tmra

A manufacturer's maximum recommended ambient temperature (Tmra) for the equipment must be specified so that the customer and installer may determine a suitable maximum operating environment for the equipment.

### 20. Elevated Operating Ambient Temperature

If installed in a closed or multi-unit rack assembly, the operating ambient temperature of the rack environment may be greater than room ambient. Therefore, consideration should be given to installing the equipment in an environment compatible with the manufacturer's maximum rated ambient temperature (Tmra).

### 21. Reduced Air Flow

Installation of the equipment in the rack should be such that the amount of airflow required for safe operation of the equipment is not compromised.

### 22. Mechanical Loading

Mounting of the equipment in the rack should be such that a hazardous condition is not caused by uneven mechanical loading.

### 23. Circuit Overloading

Consideration should be given to connection of the equipment to supply circuit and the effect that overloading of circuits might have on over current protection and supply wiring. Appropriate consideration of equipment nameplate ratings should be used when addressing this concern.

### 24. Reliable Earthing (Grounding)

Reliable grounding of rack mounted equipment should be maintained. Particular attention should be given to supply connections other than direct connections to the branch circuit (e.g., use of power strips).

### 25. Child Safety

This equipment is not suitable for use in locations where children are likely to be present.

## Mesures de sécurité

### MISE EN GARDE

RISQUE DE CHOC ÉLECTRIQUE  
NE PAS OUVRIR

**MISE EN GARDE :** POUR RÉDUIRE LE RISQUE DE CHOC ÉLECTRIQUE,  
NE RETIREZ PAS LE COUVERCLE (OU LE DOS).

CET ÉQUIPEMENT NE CONTIENT AUCUNE PIÈCE QUI PEUT ÊTRE REMPLACÉE PAR L'UTILISATEUR.  
L'ENTRETIEN DOIT ÊTRE CONFIÉ À UN PERSONNEL QUALIFIÉ.

Le pictogramme de l'éclair avec une tête de flèche au sein d'un triangle équilatéral vise à avertir l'utilisateur de la présence d'éléments sous tension dangereux non isolés au sein du boîtier du produit qui pourraient constituer un risque de choc électrique.

Le triangle équilatéral avec point d'exclamation attire l'attention de l'utilisateur sur l'importance des instructions d'utilisation et d'entretien reprises dans la documentation qui accompagne le produit.

## Précautions importantes

### 1. Lire les instructions

Il convient de lire toutes les mesures de sécurité et les instructions d'utilisation avant d'utiliser l'appareil.

### 2. Conserver les instructions

Il convient de conserver les mesures de sécurité et les instructions d'utilisation pour une référence ultérieure.

### 3. Nettoyage

Débrancher l'équipement de la prise secteur avant de le nettoyer. Ne pas utiliser de produits nettoyant liquides en aérosol. Nettoyer l'équipement à l'aide d'un chiffon doux et humide.

### 4. Accessoires

Ne jamais ajouter d'accessoires et/ou d'équipements sans l'approbation du fabricant car ces ajouts pourraient entraîner un risque d'incendie, de choc électrique ou d'autres blessures.

### 5. Eau et/ou humidité

Ne pas utiliser cet équipement à proximité d'eau ou en contact avec l'eau.

### 6. Aération

Placer cet équipement en position verticale. Cet équipement est doté d'une alimentation à découpage (SMPS) à cadre ouvert qui pourrait provoquer un incendie ou un choc électrique si un corps étranger quelconque est introduit dans les orifices d'aération situés sur les côtés de l'équipement.

### 7. Accessoires

Ne pas placer cet équipement sur un chariot, un support ou une table instables. L'équipement pourrait tomber et blesser grièvement un enfant ou un adulte, voire s'endommager fortement. L'installation sur un mur ou une étagère doit se faire dans le respect des instructions du fabricant. Il convient d'utiliser un kit d'installation approuvé par le fabricant.

L'ensemble composé de l'équipement et du chariot doit être déplacé avec soin. Les arrêts brusques, la force excessive et les surfaces inégales pourraient entraîner le renversement de l'équipement et du chariot.

### 8. Sources d'alimentation

Cet équipement doit être alimenté uniquement par un des types de source d'alimentation repris sur l'étiquette de l'équipement. En cas de doute sur le type d'alimentation, consulter le revendeur de l'équipement ou contacter le fournisseur d'énergie électrique local. Il est recommandé d'installer un onduleur pour une utilisation sûre et mettre l'équipement à l'abri des dégâts provoqués par une coupure inattendue de l'alimentation. Pour toutes les questions relatives à l'onduleur, contactez le distributeur d'onduleurs.

Cet équipement doit rester immédiatement utilisable.

### 9. Cordons d'alimentation

L'opérateur ou l'installateur doit débrancher l'alimentation et les connexions TNT avant de manipuler l'équipement.

### 10. Foudre

Pour une meilleure protection de cet équipement pendant un orage ou en l'absence d'utilisation ou de supervision pendant de longues périodes, il est conseillé de débrancher de la prise secteur et de débrancher également l'antenne et le câble. Cette mesure évitera les dégâts potentiels provoqués par la foudre ou des pics de tension.

### 11. Surcharge

Éviter de surcharger les prises murales et les rallonges électriques afin d'éviter le risque d'incendie ou de choc électrique.

### 12. Objets et liquides

Ne jamais introduire d'objet quel qu'il soit dans les orifices de cet équipement car il pourrait entrer en contact avec des points de tension dangereux ou provoquer un court-circuit entraînant un incendie ou un choc électrique. Ne jamais renverser de liquide quel qu'il soit sur l'équipement.

### 13. Entretien

Ne pas réaliser l'entretien soi-même. Confier toute intervention d'entretien à un personnel qualifié.

### 14. Dégât requérant une intervention d'entretien

Débrancher l'équipement de la prise murale et confier l'entretien à un personnel qualifié dans les conditions suivantes :

- A. Le cordon d'alimentation ou la fiche ont été endommagés.
- B. Un liquide a été renversé ou des objets sont tombés dans l'équipement.
- C. L'équipement a été exposé à la pluie ou à de l'eau.
- D. Si l'équipement ne fonctionne pas normalement malgré le respect des instructions d'utilisation, il faut régler uniquement les commandes couvertes par ces instructions. Le réglage inadéquat des autres commandes pourrait provoquer des dégâts et entraîner une intervention prolongée d'un technicien qualifié pour rétablir le fonctionnement normal de l'équipement.
- E. En cas de chute de l'équipement ou d'endommagement de l'armoire.
- F. Quand les performances de l'équipement se dégradent de façon notable.  
Ceci indique la nécessité d'un entretien.

### 15. Pièces de rechange

Quand des pièces doivent être changées, il faut s'assurer que les pièces de rechange utilisées par le technicien sont celles recommandées par le fabricant ou qu'elles possèdent des caractéristiques identiques à celles de la pièce d'origine. Tout remplacement non autorisé pourrait provoquer un incendie, un choc électrique ou d'autres dangers.

### 16. Contrôle de sécurité

À l'issue de toute opération d'entretien ou de réparation sur l'équipement, le technicien devra réaliser des contrôles de sécurité pour confirmer que l'état de fonctionnement de l'équipement en question est adéquat.

### 17. Installation sur le terrain

L'installation doit être réalisée par un technicien d'entretien qualifié, dans le respect des réglementations locales.

### 18. Batteries correctes

Avertissement : risque d'explosion en cas d'utilisation d'une batterie de type incorrect. Le remplacer uniquement par un type identique ou équivalent.

Mettre les batteries usées au rebut conformément aux instructions. La batterie ne doit pas être exposée à une source de chaleur excessive, telle que le soleil, le feu, ou analogue.

Ne pas jeter une batterie au feu ou dans un four chaud, ni l'écraser ou la couper mécaniquement, car cela pourrait provoquer une explosion.

Ne pas laisser une batterie dans un environnement exposé à une température extrêmement élevée, car cela pourrait entraîner une explosion ou une fuite de liquide ou de gaz inflammable.

Ne pas laisser une batterie dans un environnement soumis à une pression atmosphérique extrêmement basse, car cela pourrait entraîner une explosion ou une fuite de liquide ou de gaz inflammable.

### 19. Tam

Il faut déterminer la température ambiante maximale recommandée par le fabricant pour l'équipement afin que le client et l'installateur puissent identifier les conditions de service maximales adéquates pour l'équipement.

### 20. Température de service ambiante élevée

En cas d'installation dans un cabinet fermé ou contenant plusieurs appareils, la température de service ambiante du cabinet peut être supérieur à celle de la pièce. Par conséquent, penser à installer l'équipement dans un environnement compatible avec la température ambiante maximum préconisée par le fabricant.

### 21. Flux d'air réduit

En cas d'installation dans un cabinet, le flux d'air requis pour l'utilisation sans danger de l'équipement doit être garanti.

### 22. Charge mécanique

L'installation de l'équipement dans un cabinet doit être réalisée de telle sorte qu'aucune situation dangereuse ne découle d'une charge mécanique inégale.

### 23. Surcharge du circuit

Il convient de penser au branchement de l'équipement au circuit d'alimentation et aux effets d'une surcharge des circuits sur la protection contre le courant et les fils d'alimentation. Pour ce faire, prêter attention aux valeurs reprises sur la plaque signalétique de l'équipement.

### 24. Mise à la masse fiable (Mise à la terre)

Il convient de préserver la mise à la masse fiable des équipements montés sur bâti. Prêter une attention particulière aux connexions d'alimentation autres que les connexions directes au circuit (par exemple, utilisation d'un bloc multiprise).

### 25. Sécurité des enfants

Cet équipement n'est pas adapté à une utilisation dans des endroits où des enfants sont susceptibles d'être présents.

## In-Text

Symbol	Type	Description
	<b>Caution</b>	Important information concerning a specific function.
	<b>Note</b>	Useful information concerning a specific function.

## User's Caution Statement

**Caution:** Any changes or modifications to the equipment not expressly approved by the party responsible for compliance could void your authority to operate the equipment.

## FCC Compliance Statement

THIS EQUIPMENT HAS BEEN TESTED AND FOUND TO COMPLY WITH THE LIMITS FOR A CLASS A DIGITAL DEVICE, PURSUANT TO PART 15 OF THE FCC RULES. THESE LIMITS ARE DESIGNED TO PROVIDE REASONABLE PROTECTION AGAINST HARMFUL INTERFERENCE WHEN THE EQUIPMENT IS OPERATED IN A COMMERCIAL ENVIRONMENT. THIS EQUIPMENT GENERATES, USES, AND CAN RADIATE RADIO FREQUENCY ENERGY AND IF NOT INSTALLED AND USED IN ACCORDANCE WITH THE INSTRUCTION MANUAL, MAY CAUSE HARMFUL INTERFERENCE TO RADIO COMMUNICATIONS. OPERATION OF THIS EQUIPMENT IN A RESIDENTIAL AREA IS LIKELY TO CAUSE HARMFUL INTERFERENCE, IN WHICH CASE USERS WILL BE REQUIRED TO CORRECT THE INTERFERENCE AT THEIR OWN EXPENSE.

**WARNING:** CHANGES OR MODIFICATIONS NOT EXPRESSLY APPROVED BY THE PARTY RESPONSIBLE FOR COMPLIANCE COULD VOID THE USER'S AUTHORITY TO OPERATE THE EQUIPMENT.

THIS CLASS OF DIGITAL APPARATUS MEETS ALL REQUIREMENTS OF THE CANADIAN INTERFERENCE CAUSING EQUIPMENT REGULATIONS.

**AVERTISSEMENT:** TOUT CHANGEMENT OU MODIFICATION QUI N'A PAS OBTENU L'APPROBATION EXPRESSE DE L'AUTORITÉ RESPONSABLE DE LA CONFORMITÉ POURRAIT SE TRADUIRE POUR L'UTILISATEUR PAR LE RETRAIT DE L'AUTORISATION D'UTILISER L'ÉQUIPEMENT.

CETTE CLASSE D'APPAREIL NUMÉRIQUE RÉPOND À TOUTES LES EXIGENCES DES RÉGLEMENTATIONS CANADIENNES APPLICABLES AUX ÉQUIPEMENTS QUI PROVOQUENT DES INTERFÉRENCES.

## WEEE (Waste Electrical & Electronic Equipment)

### **Correct Disposal of This Product**

**(Applicable in the European Union and other European countries with separate collection systems)**

This marking shown on the product or its literature, indicates that it should not be disposed with other household wastes at the end of its working life. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate this from other types of wastes and recycle it responsibly to promote the sustainable reuse of material resources.

Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take this item for environmentally safe recycling.

Business users should contact their supplier and check the terms and conditions of the purchase contract. This product should not be mixed with other commercial wastes for disposal.

## Product Features

This is a Hybrid network video recorder that supports surveillance, recording, and playback of video from analog cameras and network cameras (or video encoders).

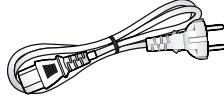

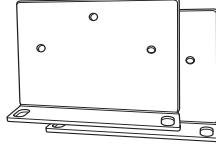

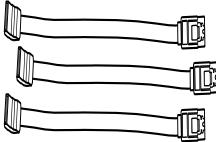

- Real-time channels surveillance
- Compatible with Color (NTSC or PAL) and B&W (CCIR and EIA-170) Video Sources
- H.264(not supported for analog cameras), H.265 Codec
- Real-time 480ips analog cameras video recording (standard for Full HD resolution)
- Real-time 120ips network cameras video recording (standard for UHD resolution)
- Auto Detection for HD-TVI, AHD, NTSC and PAL/Auto Detection for FHD, 4MP and 5MP / Camera Auto Detection for HD and SD
- HDMI out (1), VGA out (1), and SPOT out (1) ports at the same time
- UTC for camera menu control (controls camera menu using coax cable)
- Fast and easy search feature (Time-Lapse, Event log, Motion, Text-In)
- Simultaneously survey, record, play back, and transmit data in real-time
- Graphic User Interface(GUI) and multilingual
- Multiple recording modes (Schedule, Event, Pre-Event, and Panic)
- Continuous Recording in Disk Overwrite Mode
- 1 USB 3.0 and 2 USB 2.0 ports (for connecting peripherals, upgrading software, and saving recording data)
- Text Input for ATM and POS
- Two-way audio communication
- 4-channel audio recording and 1-channel audio playback
- Network camera audio recording and 1-channel audio playback
- 16 alarm ins, 1 alarm reset in, 4 alarm outs, and Built-in Alarm Buzzer
- Automated system event alerts (industry standard S.M.A.R.T. protocol for HDD status alerts)
- Real-time 8 channels DirectIP network surveillance
- Network camera zero configuration
- Configuration-free network camera access
- Exports setup, system log and clip-copy files on network

## Table of Contents

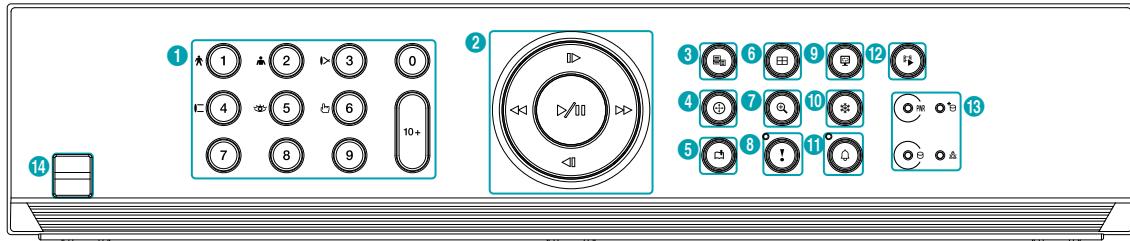

## Accessories

Upon unpackaging the product, check the contents inside to ensure that all the following accessories are included.

		
Hybrid Network Video Recorder	Power Cable	Quick Guide
		
Optical USB Mouse	Assembly Screws for Adding Hard Disk Drives	Rack-mount Kit
		
SATA cables		

## Overview

### Front Panel

<b>①</b>	<b>Camera Buttons</b>	<b>②</b>	<b>Arrow and Playback Control Buttons</b>	<b>③</b>	<b>Menu Button</b>	<b>④</b>	<b>PTZ Button</b>
<b>⑤</b>	<b>Bookmark Button</b>	<b>⑥</b>	<b>Layout Button</b>	<b>⑦</b>	<b>Zoom Button</b>	<b>⑧</b>	<b>Panic Recording Button</b>
<b>⑨</b>	<b>Monitor Button</b>	<b>⑩</b>	<b>Freeze Button</b>	<b>⑪</b>	<b>Alarm Button</b>	<b>⑫</b>	<b>Search Mode Button</b>
<b>⑬</b>	<b>LEDs</b>	<b>⑭</b>	<b>USB Ports</b>				

- Some buttons have more than one function.  
 • Access various windows and menus using a USB mouse as you would on a personal computer.  
 • For easier system configuration, a USB mouse is recommended.

**① Camera Buttons**

Pressing the **Camera** buttons while in Live or Playback mode displays images from the selected camera in full screen. To select a camera whose channel is made up of two digits, enter the **0** button.

**② Arrow and Playback Control Buttons**

These buttons are used to select menus and options.

<b>Enter (⬅)</b> <b>Button</b>	Used to select options or to register data entries.
<b>Setup Menu</b>	(▲/▼/◀/▶) Buttons: Moves the focus up, down, left, or right. (▲/▼) Buttons: Increases or decreases values.
<b>Playback Mode (When None is selected in the Control Area menu)</b>	▶/⏸ Button: To play the video in normal speed. ▶ is displayed on the screen. Press again during playback to pause the video and⏸ is displayed on the screen. From paused state: ◀ ▶ Button: To the previous screen  ▶ Button: To the next screen ◀◀ Button: Scans backward through the video at a fast rate. (Press to cycle through ▲◀, ▲◀◀, and ▲◀◀◀ the speed) ▶▶ Button: Scans forward through the video at a fast rate. (Press to cycle through ▶▶, ▶▶▶, and ▶▶▶▶ the speed)

**③ Menu Button**

Pressing the **Menu**  button while in Live mode displays the Live menu.

Pressing the **Menu**  button while in Search mode changes the control area.

Pressing the **Menu**  button while a camera screen is selected by pressing Enter button in Live mode displays the Camera menu. Selecting Camera Registration displays NVR and IP Camera Setup window.

Pressing and holding the **Menu**  button for 3 seconds while in Playback mode activates One-Touch mode and displays the clip copy window. If the Search menu is displayed on the top of the screen, One-Touch mode is not activated.

**④ PTZ Button**

Pressing the **PTZ**  button initiates PTZ mode, allowing you to control PTZ cameras.

In PTZ mode, use the arrow buttons to move the camera up, down, left, and right.

 <b>①</b>	Zoom-Out
 <b>②</b>	Zoom-In
 <b>③</b>	Focus Near
 <b>④</b>	Focus Far
 <b>⑤</b>	Preset View
 <b>⑥</b>	Preset Set

**⑤ Bookmark Button**

Add the current playback point to the bookmark list or move to the registered bookmark point.

**⑥ Layout Button**

Press the **Layout**  button to cycle through split screen formats.

Pressing and holding the **Layout**  button for 3 seconds allows you to select which cameras will display on the spot monitor.

**⑦ Zoom Button**

Used to zoom in on a specific part of the screen. Once zoomed in, use the arrow buttons to pan around.

**⑧ Panic Recording Button**

Pressing **Panic Recording**  button displays the  icon and commences recording irrespective of the current schedule.

Press the button again to deactivate Panic Recording mode.

Flashes in red when Panic Recording is in progress.

**⑨ Monitor Button**

Select the monitor between Main and Spot. You can select the screen format and sequence monitoring of the selected monitor.

**⑩ Freeze Button**

Used to pause Live screen.

**⑪ Alarm Button**

Pressing the **Alarm**  button while the alarm has been activated resets all NVR outputs, including the built-in buzzer. Pressing the button while the alarm is off displays the event log on the screen.

Flashes in red when an alarm event occurs.

**⑫ Search Mode Button**

Pressing the **Search Mode**  button initiates Search mode, which will allow you to search for and play back video recordings.

## Table of Contents

Pressing the **Search Mode**  button while in Search mode returns the screen to Live mode.

Pressing and holding the **Search Mode**  button for 3 seconds displays the clip copy window.

### **⑬ LEDs**

- **Power LED:** Lights up while the main unit is in operation.
-  **HDD LED:** Lights up when data is being written on the HDD or a video search is in progress.
-  **eSATA LED:** Lights up when the main unit is connected to an eSATA device.
-  **Network LED:** Lights up when the main unit is linked to an ethernet.

### **⑭ USB Ports**

#### ● **Storage Device Connection**

Connect an external USB hard drive or a USB flash memory device to one of the USB ports for use with the Clip Copy feature. The external storage device should be placed as close to the NVR as possible. It is recommended that you use a connection cable that is no longer than 180cm in length. Use the connection cable included with your external storage device to connect the device to one of NVR's USB ports. For more information Clip Copy, refer to the [Clip Copy in the operation manual](#).

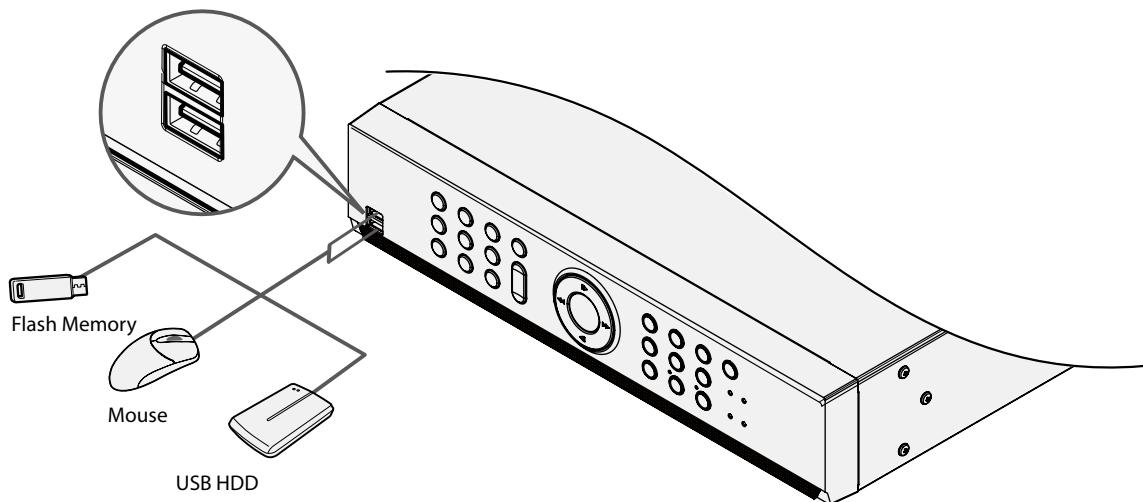

#### ● **Peripheral Device Connection**

Use the USB ports to connect peripherals such as a USB mouse to the NVR. You can also use a USB-to-serial converter and connect multiple text-in devices to the NVR at the same time.

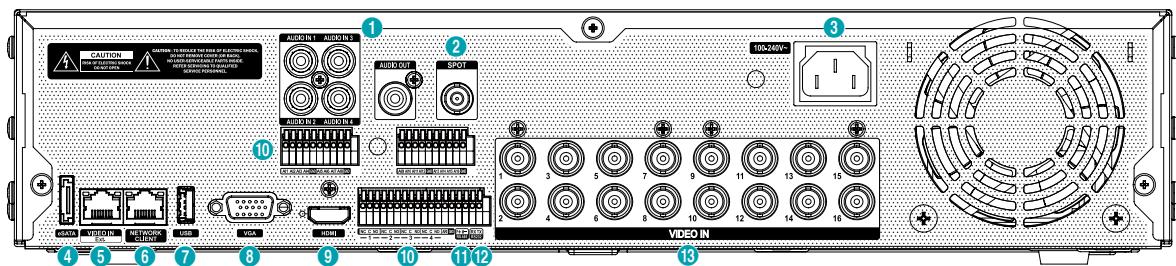

For USB flash memory devices, the NVR supports the FAT32 file format only.

## Connections on the Front Panel

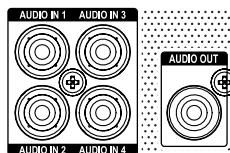

## Rear Panel

①	Audio In / Out	②	SPOT Out Port	③	Power In Port	④	eSATA Port
⑤	RJ45 Video Input Port	⑥	Network Client Port	⑦	USB 3.0 Port	⑧	VGA Out Port
⑨	HDMI Out Port	⑩	Alarm Connection Ports	⑪	RS-485 Port	⑫	RS-232 Port
⑬	Analog Video Input						

## Rear Panel Connections

### Audio Connection

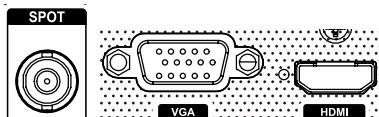

Connect the audio device to the **AUDIO IN** port and speakers with a built-in amplifier to the **AUDIO OUT** port. Use the **AUDIO OUT** port to listen to audio from analog cameras and network cameras.

Use the **AUDIO IN** port to establish two-way communication with cameras.

- This NVR does not feature a built-in audio amplifier unit and therefore requires the user to purchase a speaker system with a built-in amplifier separately. It's possible to connect an amplified audio source to the NVR, but microphones that do not have a built-in amplifier will not function properly if connected to the NVR directly. If this is the case, connect the microphone to the NVR via a pre-amp.
- Check your local laws and regulations on making audio recordings.

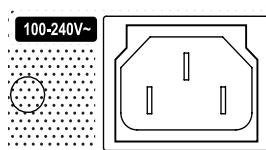

### Monitor Connection

Connect to the **VGA OUT**, **HDMI**, or **SPOT** port.

### Power Cable Connection

Connect the power cable to this port. This NVR does not feature a separate power on/off button and will turn on the moment power is supplied.

- Organize the power cable so that it will not cause people to trip over or become damaged from chairs, cabinets, desks, and other objects in the vicinity. Do not run the power cable underneath a rug or carpet.
- The power cable is grounded. Do not modify the power plug even if your power outlet does not have a ground contact.
- Do not connect multiple devices to a single power outlet.

### eSATA Connection

Connect external hard drives to these ports.

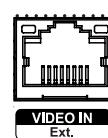

Do not connect or disconnect an eSATA device while the NVR is powered on. To connect an eSATA device, first turn off the NVR and unplug the power cable. Connect the eSATA device and then power the eSATA device first and then NVR back on. To disconnect an eSATA device, first turn off the NVR and unplug the power cable. Turn off the eSATA device and then disconnect the eSATA connection cable.

Évitez de brancher ou de débrancher un périphérique eSATA tandis que le NVR est sous tension. Pour brancher un périphérique eSATA, commencez par mettre le NVR hors tension et débrancher le câble d'alimentation. Branchez le périphérique eSATA, mettez-le sous tension, puis mettez le NVR sous tension. Pour débrancher un périphérique eSATA, mettez le NVR sous tension et débranchez le cordon d'alimentation. Mettez le périphérique eSATA sous tension, puis débranchez le câble de connexion eSATA.

### Video Connection

#### RJ45 Video In Port

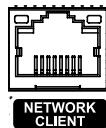

Configure the RJ45 network using Cat5/Cat5e/Cat6 cables, as well as network cameras or video encoders,

and an external hub (Optional: DH-2112PF, DH-2128PF, DH-2212PF). The NVR recognizes DirectIP network cameras automatically.

- If the connected network is 1000 BASE-T, the green LED on the right will light up, and if the link is done, the orange LED on the left will blink.
- If using a Cat5 or Cat5e cable, there might be a problem with the data transmission speed depending on the network environment.

### Network Client Connection

This NVR is capable of connecting to networks via the 10Mb/100Mb/1Gb ethernet connector. Connect an RJ-45 cable (Cat5/Cat5e/Cat6) to the NVR's network port. It's possible to operate and upgrade the NVR remotely over a network. For more information on ethernet connection setup, refer to [Network Setup in the operation manual](#).

- Connector directions may vary depending on the NVR model.

### USB 3.0 Port

### Storage Device Connection

Connect an external USB hard drive or a USB flash memory device to one of the USB ports for use with the Clip Copy feature. The external storage device should be placed as close to the NVR as possible. It is recommended that you use a connection cable that is no longer than 180cm in length. Use the connection cable included with your external storage device to connect the device to one of NVR's USB ports. For more information Clip Copy, refer to the [Clip Copy in the operation manual](#).

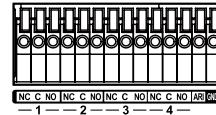

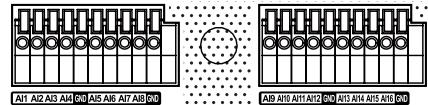

### Peripheral Device Connection

Use the USB ports to connect peripherals such as a USB mouse to the NVR. You can also use a USB-to-serial converter and connect multiple text-in devices to the NVR at the same time.

- For USB flash memory devices, the NVR supports the FAT32 file format only.

### Alarm Connection

Connect alarm connectors to these ports.

- Press down on the button and insert the cable into the opening. Release the button and then pull on the cable slightly to ensure it is held securely in place. To disconnect the cable, press down on the button again and pull the cable out.

### Alarm In 1 through 16

This NVR is capable of responding to event signals from external alarm in devices. Connect mechanical or electrical switches to AI 1 through 4 and the GND (ground) connector. In order to be recognized by the NVR, the signal from an alarm in device must be less than 0.3V (Normally Open) and maintained for at least 0.5 seconds. The alarm in voltage range is 0V to 5V. For more information on alarm in setup, refer to the [Alarm-In in the operation manual](#).

## Table of Contents

### • GND (Ground)

Connect alarm in or out's ground cable to the GND connector.

All connectors marked "GND" are common connectors.

### • NC/NO (Relay Alarm Outputs)

This NVR is capable of activating/deactivating buzzers, lights, and other external devices. Connect the device to the C and NO (Normally Open) connectors. NC/NO is a relay output which sinks 2A@125VAC and 1A@30VDC. For more information on alarm out setup, refer to the [Alarm-Out in the operation manual](#).

### • ARI (Alarm Reset In)

An external signal to the Alarm Reset In can be used to reset both the Alarm Out signal and the NVR's internal buzzer. Mechanical or electrical switches can be wired to the ARI (Alarm Reset In) and GND (Ground) connectors. The threshold voltage is below 0.3V and should be stable at least 0.5 seconds to be detected. Connect the wires to the ARI and GND connectors.

### • Connector Arrangement

<b>AI1 through AI16</b>	Alarm In 1 through 16
<b>GND</b>	Ground
<b>NC</b>	Relay Alarm Out (Normally Closed)
<b>C</b>	Relay Common
<b>NO</b>	Normally Open Relay Alarm Out
<b>ARI</b>	Alarm Reset In

### RS-485 Connection

This NVR supports the RS-485 half-duplex serial communication protocol for connecting to external devices such as POS units. The RS-485 connector can also be used to control PTZ (pan, tilt, zoom) cameras. Connect RX+/TX+ and RX-/TX- of the control system to the + and - (respectively) of the NVR.

### • Connector Pin Outs

Master Unit	Slave Unit
	+ → To → TX+/RX+
	- → To → TX-/RX-

### RS-232 Connection

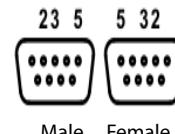

Connect an external device such as a POS unit to this port.

### • Connector Pin Outs

Master Unit	Slave Unit
	RX → To → TXD
	TX → To → RXD
	GND → To → GND

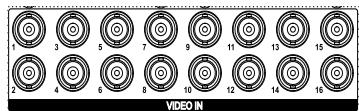

Refer to the following for pin-out details for the 9-pin connector of the slave unit.

<b>Pin 2</b>	RXD (Receive Data)
<b>Pin 3</b>	TXD (Transmit Data)
<b>Pin 5</b>	GND (Ground)

## Video Connection

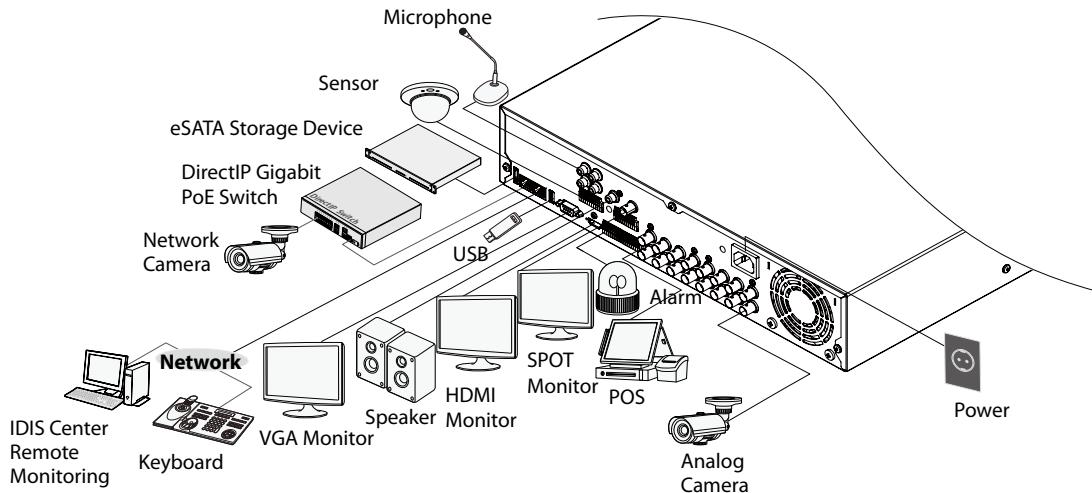

### Analog Video Input

Connect the coaxial cables from the video sources to the composite Video In connectors.

- Quality cannot be guaranteed when connecting using a method other than coaxial cable.

## Connections on the Rear Panel

## Part 2 - Appendix

---

### System Log Types

Boot Up	Panic Off
System Shutdown	Clear All Data
Restart	Clear Disk
Upgrade Success	Format Disk
Upgrade Error	Disk Full
Power Failure	Auto Deletion
Time Changed	Search Begin
Time Zone Change	Search End
Time Sync.	Clip-Copy Begin
Time Sync. Failed	Clip-Copy End
Disk Bad	Clip-Copy Cancel
Login	Clip-Copy Failure
Logout	Clip Copy User
Setup Begin	Clip-Copy Begin
Setup End	Clip-Copy Finished
Remote Setup Change	Clip Copy Duration of Video
Remote Setup Failure	Clip Copy Camera
Setup Import	Callback Failed
Setup Import Failure	Factory Reset
Setup Export	Camera Upgrade Begin
Setup Export Failure	Camera Upgrade End
Setup Export Canceled	Camera Upgrade Failed
Schedule On	Camera Upgrade User
Schedule Off	Camera Upgrade Camera
Panic On	

## Error Code Types

<b>Upgrade Error Codes</b>			
No.	Type	No.	Type
0	Unknown Error	301	Remote Network Error
1	Incorrect File Version	302	No Remote Upgrade Permission
2	Incorrect OS Version	303	Remote Upgrade File Save Failure
3	Incorrect Software Version	304	Remote Upgrade Cancelled by User
4	Incorrect Kernel Version	400	USB Storage Device Mount Failure
100	Storage Device Mount Failure	401	USB Storage Device File Read Failure
101	File Not Found	402	USB Storage Device File Copy Failure
102	File Decompression Failure	403	USB Device Not Connected
103	LILO Execution Failure	404	USB Storage Device in Use
104	Reboot Failure	405	Unsupported File System
105	Improper File	500	Clip Copy in Progress: Upgrade Not Available
300	Remote Connection Failure		

<b>Clip Copy Error Codes</b>			
No.	Type	No.	Type
0	Unknown Error	11	Save Failure
1	Device Error	12	Disk Error
2	Device Connection Failure	13	Clip Player Execution File Not Found
4	Incorrect Media	14	Clip Player Execution File Access Failure
5	File Name Taken	15	Clip Player Execution File Save Failure
6	Insufficient Space	16	Image Generation Failure
7	Temporary File Generation Failure	19	Device Connection Failure
8	Disk Access Failure	20	Device in Use
9	Disk Format Failure	21	Unsupported File System
10	Database Changed	22	Data Validation Failure
		23	No Saved Data within Range

<b>Network Error Codes</b>			
No.	Type	No.	Type
0	Cause of Failure Unknown	20	Connection Cancelled by User
1	Normal Logout	21	No Response from Network Device Host
2	All Channels in Use - Connection Denied	22	High Network Noise Level
3	Incorrect Product Version Info	23	Transmission Queue Full
4	Incorrect User Name or Password	24	Incorrect OEM Info
5	Forced Disconnection by Admin	25	No Search Permission
6	Timeout	26	Port in Use
7	Network Device Terminated	27	SSL Connection Failure
8	Unable to Connect: No Available Port	28	Network Timeout
9	Server Not in Operation: Unable to Connect	29	Network Device Host Timeout
11	Network Unavailable	30	RTP via TCP Not Supported by Network Device Host
12	Different Network Zone: Unable to Access	31	Socket Error
13	Connection Timeout	100	Unknown CODEC
14	Forced Disconnection by Network Device	101	.jpeg CODEC (not supported)
15	Network Device Host Terminated	103	.mpeg4 CODEC (not supported)
16	Unable to Route to Network Device Host	400	Unsupported Resolution
17	Connection Severed	-1	Normal Access

## Troubleshooting

Problem	Solution
The main unit won't turn on.	<ul style="list-style-type: none"> <li>● Check the power cable connection status.</li> <li>● Check the power outlet.</li> </ul>
Unable to display Live video.	<ul style="list-style-type: none"> <li>● Check the camera's video cable connection status.</li> <li>● Check the monitor's video cable connection status.</li> <li>● Check the camera's power setting.</li> <li>● Check the camera lens settings.</li> <li>● Check the current main monitor resolution.</li> </ul>
NVR stopped working in the middle of a recording.	Set the NVR to Recycle mode. For more information, refer to the <a href="#"><u>General in the operation manual</u></a> .
 icon is shown, but video is not being recorded.	If the Pre-Event is enabled, the  and  icons appear when recording is not in progress, or the  and  icons appear when an event occurs and recording is in progress. For more information, refer to the <a href="#"><u>Schedule in the operation manual</u></a> .

## Specifications

These product specifications may change without prior notice.

<b>VIDEO</b>	
<b>Video Inputs</b>	Analog : 16 BNC, 1 Vp-p, auto-terminating, 75 Ohms Network : 8 channels
<b>Video Outputs</b>	1 HDMI, 1 VGA, 1 SPOT (1 Vp-p, 75 Ohms)
<b>Display Resolution</b>	HDMI : 3840 x 2160, 1920 x 1080, 1280 x 1024 VGA : 1920 x 1080, 1280 x 1024
<b>Display Speed</b>	Analog : 480ips@1080p, 240ips@4MP, 160ips@5MP Network : 120Mbps, 240ips(8CH)@UHD
<b>RECORDING</b>	
<b>Max. Throughput</b>	Analog : 480ips@1080p, 240ips@4MP, 160ips@5MP Network : 120Mbps, 240ips(8CH)@UHD
<b>Compression</b>	H.264(not supported for analog cameras), H.265
<b>Recording Mode</b>	Time-Lapse, Event, Pre-Event, Panic
<b>PLAYBACK</b>	
<b>Performance</b>	16ch 1080p synchronous playback 8ch 4K + 8ch 5MPH playback
<b>Recording Mode</b>	Time-lapse, Event log, Text-in
<b>STORAGE</b>	
<b>HDD</b>	SATA x4
<b>Total Capacity</b>	24TB = 6TB x 4
<b>Data Export Device</b>	USB HDD, USB Stick
<b>NETWORK</b>	
<b>Video in Connection</b>	Gigabit Ethernet(Ext) x1
<b>Client Connection</b>	Gigabit Ethernet(Client) x 1
<b>Transmission Speed</b>	50Mbps
<b>Event Notification</b>	Email (attach clip (.cbf, .MP4)), Callback to Remote S/W, Push notification (IDIS Mobile), NetFS(FTP)
<b>INTERFACE</b>	
<b>Audio In/Out</b>	Local(NVR) : 4 / 1RCA + 1HDMI IP Camera : 8 / 8(Depending on IP camera)
<b>Alarm Spec- In</b>	16 TTL, NC/NO programmable, 3.0V (NC) or 0.3V (NO) threshold, 5VDC
<b>Alarm Spec- Out</b>	4 relay output, NO programmable, terminal blocks, 2A@125VAC, 1A@30VDC
<b>Alarm Reset In</b>	1 TTL, 0.3V (Reset) threshold, 5VDC
<b>Internal Buzzer</b>	Yes

<b>Serial Interface</b>	RS-232 (Terminal Block), RS-485 (Terminal Block)
<b>USB</b>	USB 3.0 x 1, USB 2.0 x 2
<b>GENERAL</b>	
<b>Unit Dimensions (W x H x D)</b>	430mm x 88mm x 415mm (16.92" x 3.46" x 16.33")
<b>Unit Weight</b>	6.4kg (with 2 x 2TB)
<b>Working Temperature</b>	0°C – 40°C (32°F ~ 104°F)
<b>Operating Humidity</b>	0% – 90%
<b>Power Input</b>	100-240V~, 50/60Hz, 1.0-0.5A
<b>Power Consumption</b>	72W
<b>Approvals</b>	FCC, CE, KC

 Some hard disks may not function properly when mounted on to this product. Refer to the compatibility chart below before mounting any additional hard disk on to the product. Hard disk compatibility chart is subject to change without notice. Contact your retailer for the latest compatibility chart.

<b>Storage</b>	<b>Manufacturer</b>	<b>Model</b>	<b>Note</b>
2TB	Western Digital	WD22PURU-64C5JY0	
4TB	Seagate	ST4000VX015	
6TB	Western Digital	WD63PURU-64C4FY0
