

## DYNAMIC VIDEO WALL SOLUTION

# IDIS Wall Station

Makes building and deploying dynamic, next-generation video walls of any type and size simple, fast, and convenient

Simple and Intuitive Operation

Zero Latency for Faster Incident Response

Seamless Integration, Controls and Management of Any Third-Party Video Device

High-Performance, Real-Time Video Display

Low TCO  
(Total Cost of Ownership)  
for End-Users

Low TCS  
(Total Cost of Service)  
for System Integrators

## A Rich Set of Intuitive Features to Optimize Centralized Monitoring

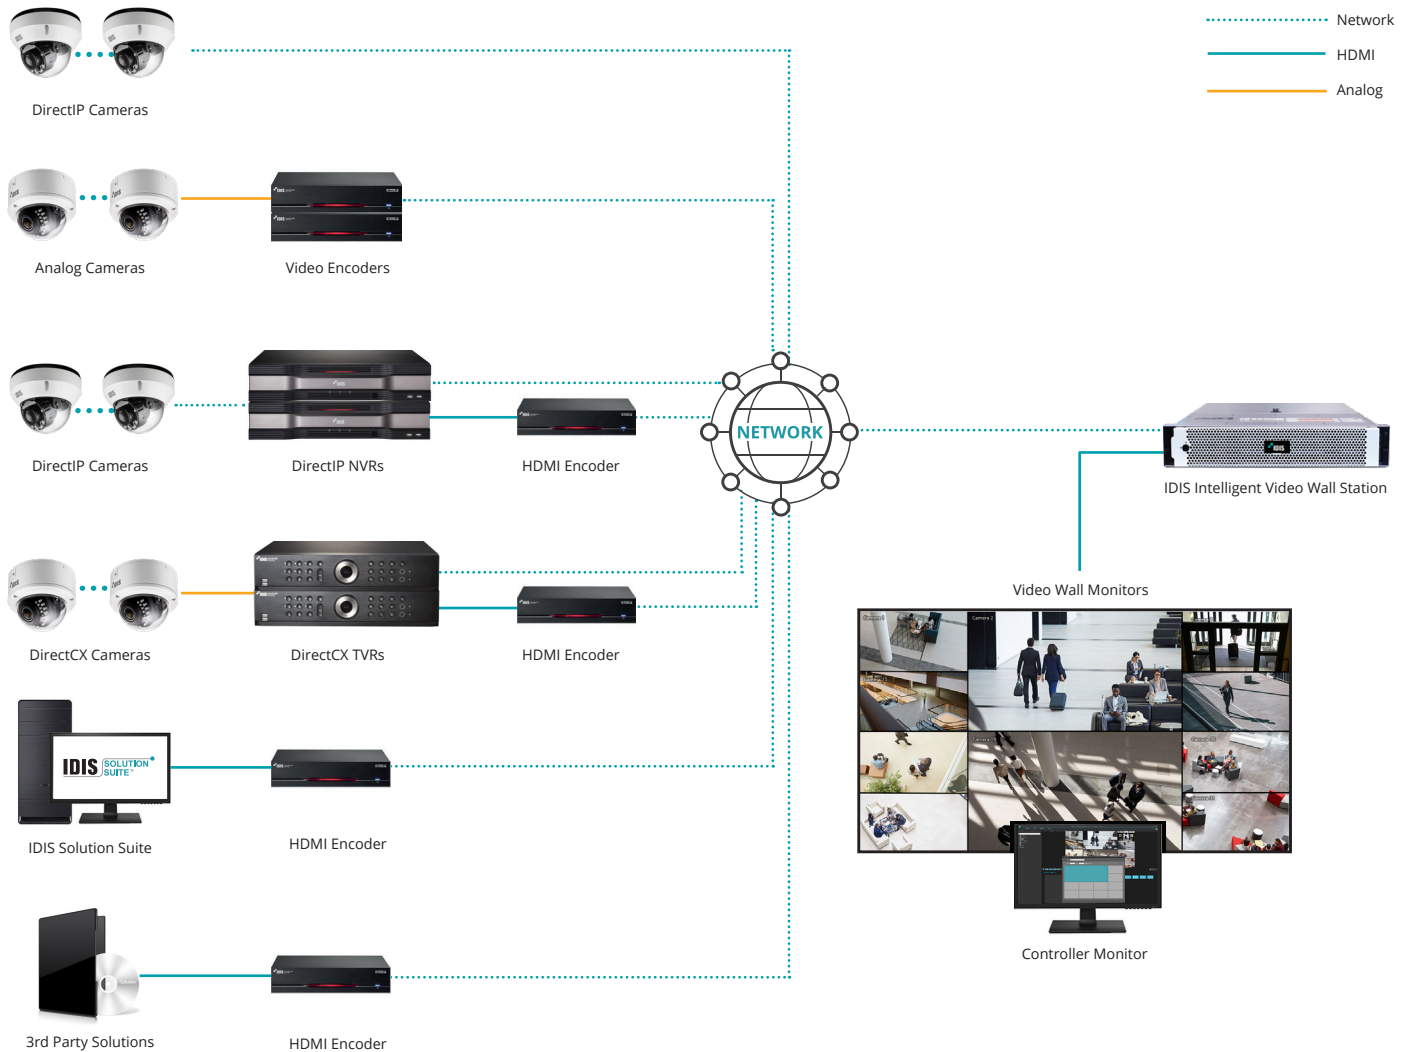

- Centralized registration, control, and management of all connected devices
- Power redundancy for reliable and stable operations
- Simultaneous monitoring of up to 64 panes and 4,096 cameras
- Manage up to 16 monitors and layout control with a single network wall controller
- 4K/UHD resolution display and H.264/H.265 dual codec support
- Up to 8 x UHD @ 30ips input
- Up to 16 x FHD @ 60ips input
- Video search, Playback and Export
- Configuration of event associated display layouts

## Simple Configuration and Maintenance

- Remote configuration of devices and batch firmware updates
- Efficient access management by individual role or multi-user groups
- System maintenance logs and audit trails by user, system, device, and event
- Consolidated device status and health monitoring

## System Diagram

## Specification

SYSTEM	8CH server	12CH server	16CH server
Video Outputs	8 DP, 3 mini DP	12 DP, 3 mini DP	16 DP, 3 mini DP
	DP for Video Wall Monitor, mini DP for controller Monitor		
Available Grid layouts for FHD Wall	*2x2, *2x3, *2x4	*3x3, *2x5, *2x6, *3x4	*2x7, *3x5, *2x8, *4x4
Available Grid layouts for UHD Wall	*2x2	*2x3	*2x4

\* Rows X columns.
