

# Australia's Yusen Logistics Warehouses Supported By IDIS

No matter the industry or the installation requirement, IDIS offers universal innovation and resolute solutions to the world through the power of surveillance. With solutions that demonstrate quality without complexity, IDIS is South Korea's most trusted surveillance brand that's expanded their offerings for the whole world to utilise - including Australian Security services provider West Tech Security Pty Ltd.

## Background

Australian security services provider West Tech, equip a variety of warehouses, commercial and residential sites with quality security solutions from alarm monitoring systems, to video analytics and more. Many sites across New South Wales benefit from solutions and services provided by West Tech - and IDIS installations are a trusted avenue for West Tech to achieve this.

With the supply of Dicker Data DAS, West Tech have fitted out an optimal suite of IDIS solutions for two warehouses of Yusen Logistics, a global leader in supply chain logistics and digital solutions.

The IDIS solution suite powering Yusen Logistics

## Solutions

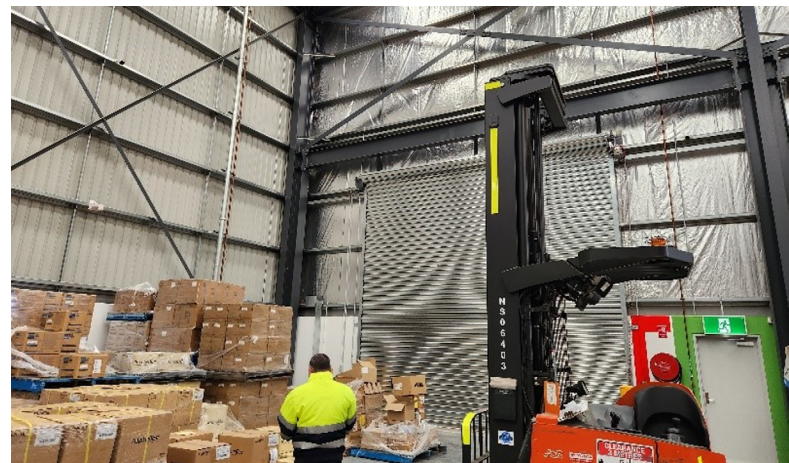

Deployed IDIS products comprise of DR-6532P-4TB NVRs, DC-D4811WRX-A-3.3MM 8MP Dome Cameras, and DC-T4831HRX 8MP Bullet Cameras.

The IDIS systems installed in each Yusen Logistics warehouse are NDAA compliant, a multi award-winning standard that upholds industry-best performance to ensure the area under surveillance has the best technology to stay safe. For Yusen Logistics, this means that their IDIS installation ensures their stock, perimeters, walkways, and entrances are constantly visible which results in having a robust, anti-vandal surveillance system. The installed IDIS cameras in particular enables Yusen Logistics to manage OH&S through 24/7 surveillance and record incidents such as accidents, slips, unsafe or inappropriate actions and other events.

## Results & Benefits

As the end user of this project, Yusen Logistics are extremely satisfied with their IDIS surveillance system, which in turn pleases West Tech.

“When asked to provide a surveillance solution for Yusen’s new sites, the two main factors that had to be ticked off were reliability of the system and useability for the operator. It was an easy choice to go with IDIS. Delivery of the projects was smooth and trouble free with exceptional support from DAS as always and the high quality IDIS product making installation and commissioning seamless.”

MARK WEST, DIRECTOR OF WEST TECH

Installed: DC-D4811WRX-A-3.3MM 8MP Dome Camera

## Results & Benefits cont..

Having just relocated sites and upgrading our system to the IDIS solution, a remarkable technical improvement has been realised. The 8MP dome and bullet cameras display rich 4K pictures that exhibit unparalleled detail. We have used the IDIS system to review a recent accident on site, the ease to record locally and zoom function was invaluable.

The installation process was quick and seamless which allowed our business to meet our timelines while ensuring our customers stock was secure at the time of our relocation. The functionalities that the system provides enables greater visibility of our warehouse floor and loading docks across both the internal and external perimeter of the building. With this system in place, our customers are happy knowing that their stock is safe and secure.

We have been in partnership with Mark West of West Tech for many years. Mark takes the time to understand our requirements and provides high levels of service to ensure the end result is achieved. We would highly recommend West Tech for your IDIS solution security needs.
