

IDIS SUPER FISHEYE

SUPER DEWARPING

Dual Side Dewarping | Mobile Dewarping | Smooth Dewarping

The IDIS Super Fisheye offers unparalleled and comprehensive viewing capabilities, allowing users to simultaneously monitor and analyze up to 256 points of interest without any blind spots. With a 5 Megapixel dome camera enabling full 360° panoramic surveillance, the IDIS Super Fisheye offers industry-leading dewarping technology and is compatible with a wide choice of recording platforms (including enterprise-level VMS, DirectIP™ NVRs, and edge recording).

Viewers can easily control and monitor in real time with IDIS's Smart e-PTZ function. Users are able to spin any image at different speeds and in different directions without latency or delay, in both live-view and during playback using e-PTZ and auto-Pan and Zoom functionality.

The clarity and coverage offered by the IDIS Super Fisheye means fewer cameras are required to cover any area, delivering cost savings on equipment and installation for users without sacrificing world-class IDIS quality.

Reduce Equipment and Installation Costs

Cover a wider area with a single 360° camera

By providing complete field of view coverage, the IDIS Fisheye camera significantly reduces the number of cameras required to cover a particular area, resulting in lower cost of ownership.

Experience True Dual Side Dewarping

Dewarping camera-side and on client PC and mobile devices

IDIS Fisheye cameras support dewarping both on the camera and on client applications, including mobile devices, offering customers a wide choice of recording platforms and VMS options.

Never Miss a Detail with High Definition

5MP high resolution

The 5MP ultra-high resolution images provided by the IDIS Fisheye camera produce more detail and wider coverage than standard resolution cameras.

Install Quickly, Easily, and Affordably

Easy installation with DirectIP™ NVRs

The DirectIP™ true plug-and-play functionality and automatic network detection and device setup result in a system that is quick, easy, and cost effective to install.
