

IDIS DR-8364

DirectIP™ 64 Channel Full HD Real-Time Recorder

Enterprise-Level Performance at an NVR Cost

With 64 channels and Full HD recording capabilities, the IDIS DirectIP DR-8364 recorder offers enterprise-level performance, first class network security, and critical redundancy, managing both cost and complexity. The DR-8364 delivers technical capabilities and cost advantages to the marketplace in ways previously unseen.

Shortlisted as a “CCTV System of the Year,” the DR-8364D comes with an NVR price tag and is suitable for a range of surveillance applications including large campuses, multi-site organizations, city-wide surveillance, and other mission critical security operations. These types of mission critical environments are traditionally regarded as the preserve of server-based systems, which can typically be four times the cost of NVR-based solutions. This is due to the cost of server equipment, its associated maintenance, and the requirement for specialist professional services. Further, server-based systems are often storage hungry and while storage prices have decreased in recent years, they still equate to around 30% of the cost of surveillance implementations.

That is why IDIS took a revolutionary NVR-based approach to enterprise-level surveillance and launched the 64 channel DR-8364D that will never ask customers to trade performance for cost. To support mission critical security operations, the DR-8364D features class-leading throughput of 900Mbps, redundant power, and IDIS Smart Failover, allowing seamless protection in the event of a network disruption.

World-Class Performance

64 channel Full HD live, record, and remote view with 900Mbps total incoming throughput (recording 400Mbps / remote 500Mbps) with expandability up to 24 HDD.

Optimized Storage

Up to 90% storage savings with IDIS Intelligent Codec combined with Motion Adaptive Transmission (MAT) and support for RAID 1/5/10.

Network Security and Data Integrity

IDIS proprietary protocols, SSL encryption, and true plug-and-play, even for multi-site implementations, to reduce complexity and patent-protected database file system.

Part of the DirectIP Family

Ease of installation and use, reduced training, forward and backward compatibility, and no annual license fees, guaranteeing a low total cost of ownership.

Redundant Reassurance

IDIS Smart Failover provides 24 hours of uninterrupted SD card recording in the event of connection failure, plus dual power supply on the DR-8364D model.
