

Ground-breaking advances in video surveillance quality, usability, and affordability mark the industry leader's first two decades.

Celebrating Twenty Years of IDIS Innovation

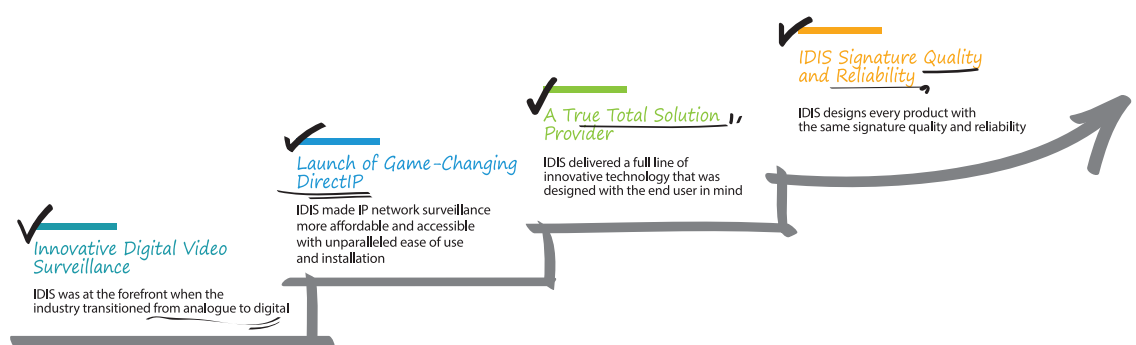

Founded in 1997 by experts in computer science and artificial intelligence, IDIS has been at the forefront of surveillance innovation for over two decades. An early pioneer in the move from analogue to digital, IDIS soon grew to be the world's number one digital video recorder (DVR) seller as an Original Equipment

Manufacturer (OEM), winning a number of business accolades along the way.

In 2013, IDIS launched its brand business with the game-changing DirectIP™ at its heart, and by 2015, had established multiple regional headquarters around the globe. Today, IDIS delivers a total solution, offering a comprehensive end-to-end suite of offerings, featuring next-generation analogue and IP recorders, cameras, monitors, accessories, and an incredibly powerful video management software (VMS). All are designed, developed, and manufactured in-house by IDIS. Modular and affordable like no other on the market, IDIS meets surveillance needs of any size and complexity, specifically known for industry-leading quality and reliability.

Today, IDIS has continued to be an industry pioneer. It has grown to become a leading global security company and the largest video surveillance manufacturer in South Korea, with more than two million recorders installed worldwide and over 16.5 million cameras utilizing IDIS technology.

IDIS innovation is as strong today, as ever! Visit www.idisglobal.com to learn more about the company's latest next-generation offerings.
