The Vision to Excel

IDIS is an established global security solutions company which designs, develops, manufactures and markets security surveillance solutions. Since 1997 we have grown to become the world's No.1 DVR manufacturer with an annual turnover of \$140 million with more than 1.7 million DVRs installed through our global top tier partners.

Our aim is to be the world's leading provider and partner of choice for surveillance solutions that protect people, property and assets through innovation and cost-effective technology coupled with unrivalled performance, quality and functionality.

THE CORE STRENGTH AND VALUES OF THE COMPANY ARE:

Innovation

IDIS is a pioneer in the video surveillance market. Our history demonstrates our ability to turn innovation into practical applications. We are at the very frontier of industry technology. IDIS has developed over 100 different products to date and has 50 core patented technologies.

Credibility

IDIS is a recognised expert in the security industry, and we have quickly established ourselves as world-class solution provider. We are proud to be at the forefront of the industry. Our growth ambitions remain on track underpinned by our significant resources and financial stability.

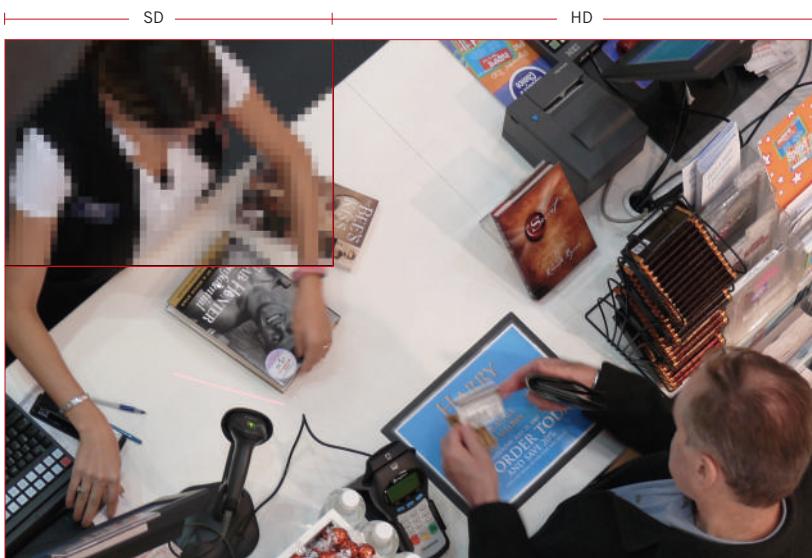

Sustainable growth

At IDIS we have built a reputation of trust with partners, suppliers and customers. Since the company was established, IDIS has built strong and proactive relationships. We value the contribution of our staff, suppliers, partners, direct customers and even competitors in shaping the future of the security industry.

Direct IP™

Increasing demand for HD surveillance

In the past there has been market reluctance to adapt to IP-based surveillance systems, often because they are perceived as being more complicated than conventional analogue solutions.

The analogue surveillance market has been developed to embrace digital video technology over a number of years primarily by using analogue cameras, supported by digital video recorders (DVRs). However, the demand for HD resolution continues to grow and is quickly becoming the norm for many security conscious businesses.

IP based security systems provide higher image quality than DVRs, as a network video recorder (NVR) does not need to compress incoming video sources (as this is supplied by the cameras). However this function alone will not fulfill the end users' expectation.

Challenges of affordability, performance, integration and compatibility are inherent to the market place, with many traditional IP based security systems being very complex to install, especially when communicating with multiple sensors, audio devices and ATM/POS devices.

DirectIP™
relieves those complexities

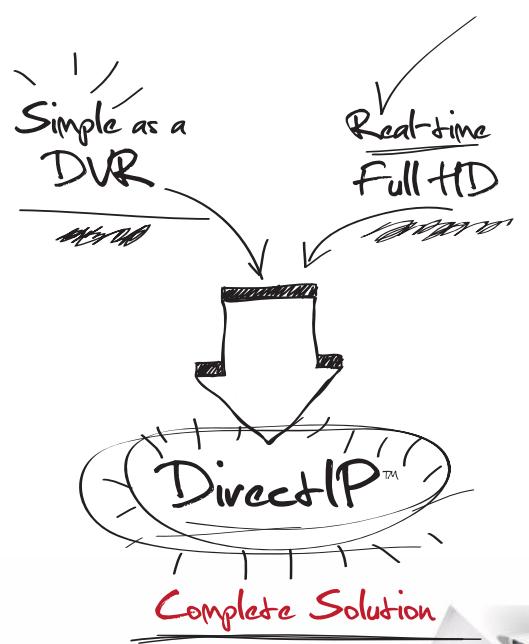

The simple and the most complete HD surveillance solution

DirectIP™

IDIS is a company that has been primarily responsible for the innovation of DVRs since 1997 and now IDIS is proud to introduce the next generation of HD surveillance solutions called DirectIP™ solutions. Unique to the industry, DirectIP™ is the easiest and the most complete HD surveillance solution available to the security market.

The primary goal of DirectIP™ technology is to provide customers with an HD surveillance solution which is easy to use, simple to install and quick to configure through 'plug-and-play' capability. DirectIP™ consists of IP cameras, NVRs and VMS software, all designed to be optimised within a network.

DirectIP™ allows real-time monitoring without any degradation of image quality whilst simultaneously recording within networks. DirectIP™ is exclusive to the industry and ensures genuine compatibility, integration and functionality as a complete one stop shop solution.

NETWORK VIDEO RECORDERS

High performance and reliability

simply the best performance for your IP surveillance

Full mega-pixel IP camera support with efficient data processing and a high hardware specification ensure a smoother operation that guarantees the best performance of your IP solution. With DirectIP™ NVRs the hardware is fully optimised for the stable performance of network devices, so you can realise a real-time live viewing and real-time recording network surveillance solution. DirectIP™ NVRs allow simultaneous functionality and operation including live-view, record, playback, remote access and backup of compressed audio and video.

KEY FEATURES

- Easy installation with DirectIP™ NVR
- Supports 16:9 HD resolution
- Vari-focal lens (f= 3.3 ~ 12mm)
- 3-axis mechanical design for installation
- PoE (IEEE 802.3af Class 2)
- Two-way audio
- Alarm in / out
- Micro SD (HC)
- Supports ONVIF™

NETWORK VIDEO RECORDING SOLUTIONS

IDIS SOLUTION SUITE

ISS is highly scalable
and fully integrated network video surveillance solution.

The IDIS Solution Suite (ISS) is a highly scalable and fully integrated network video surveillance management solution.

ISS is suitable for both large enterprise customers as well as smaller surveillance operations for home-security and small business. ISS Compact provides an intuitive GUI for the installer unfamiliar with IT networks and the powerful recording features are available without license fees.

ISS Expert provides a general-purpose network video recording application that will satisfy a wide range of customer requirements without complicated licensing structures. ISS Expert is the perfect solution for project-based surveillance rollouts as it is optionally integrates and transforms to exact customer requirements. Born out of IDIS's deep understanding of the surveillance market and a huge range of customer applications, ISS Expert is exceptionally scalable and flexible. Using proven IDIS products including megapixel cameras and keyboards, the system is expandable to ensure a future proof surveillance solution.

KEY FEATURES (based on IDIS Solution Suite Expert)

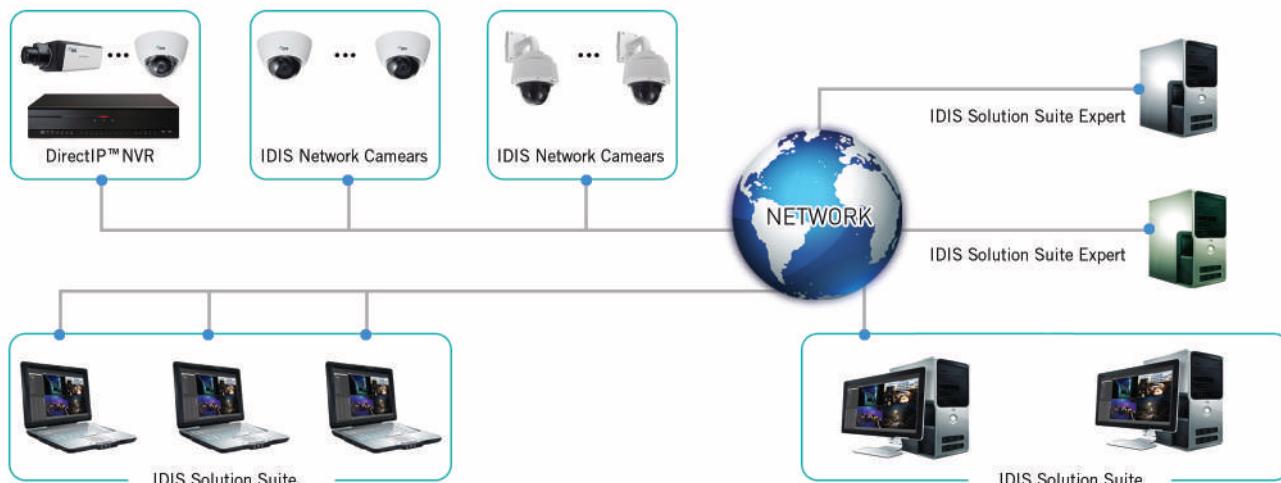

- Supports DirectIP™ NVRs, IDIS network cameras and third-party network cameras
- Centralised system operation, management and event handling
- Supports up to 64 simultaneous connections
- Map monitoring of live images
- Remote monitoring of live images in multiple client systems through a streaming service
- Stable streaming with multiple servers through a load balancing function during installation
- Remote software upgrades and multiple system setup
- Enhanced security enabled with different authorities for each user group
- Enhanced security using SSL functionality
- Two-way audio communication and audio broadcasting
- Control using a network keyboard
- Text-in and alarm function via TCP networking
- Supports multiple services such as federation, backup, video wall service.

NETWORK CONFIGURATION OF IDIS SOLUTION SUITE EXPERT

NETWORK CONFIGURATION OF IDIS SOLUTION SUITE COMPACT

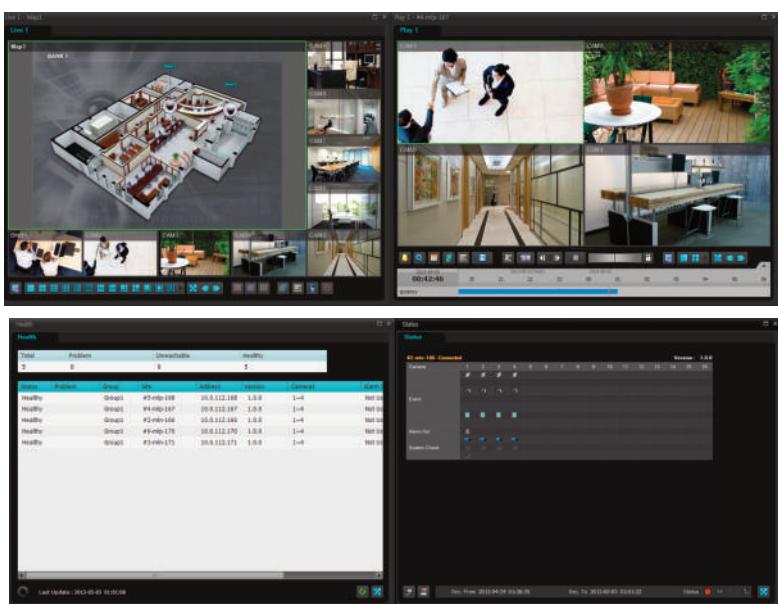

NETWORK ADMINISTRATION CLIENT

IDIS CENTER

IDIS Center provides customers

with plug-and-play management software to install
and operate network cameras and network video recorders

IDIS Center is a central management software solution that supports live monitoring, video playback as well as advanced management tools including event monitoring, e-maps and condition monitoring of devices.

KEY FEATURES (based on IDIS Solution Suite Expert)

- Remote surveillance of live videos and remote playback of video recordings
- Real-time notification of detected events and remote monitoring of event videos
- Panic recording of live videos and playback of panic recordings
- Registration of up to 1,024 devices
- Remote software upgrade and system configuration
- Displays device's system logs
- Monitoring live e-map
- H.264, MPEG-4, M-JPEG restoration algorithm support
- SSL support for security
- Authority settings by user groups for security
- Intuitive and user-oriented GUI
- Supports Removable HDD(SD card) Play
- All live viewing, searches, e-maps and condition monitoring can be executed simultaneously by displaying distinctly different panels on four different monitors.

WEB CLIENT

IDIS WEB

IDIS Web is a program that allows you to view and search video from remote locations over the Internet and can be accessed on a regular web browser such as Internet Explorer. IDIS Web can be downloaded from web browsers in ActiveX format.

KEY FEATURES

- Supports 32 divided screen surveillance
- Controls PTZ, colour, alarm out feature
- Supports 32 divided screen playback
- Supports video back-up with IDIS Player, AVI, BMP
- Supports storage and print-out of current image on screen

CONNECTION METHOD

1. **http://IP Address: Port Number**

(NVR system's IP address and IDIS Web port number configured under Network > General (Default Value: 12088)

2. **http://fen.idisglobal.com/FEN Name**

(FEN Name: NVR name configured on the FEN server)

3. **http://web.idisglobal.com**

(will be prompted to enter NVR's IP address or FEN name registered to the FEN server upon login)

MOBILE CLIENT

IDIS MOBILE

You can access a remote NVR, monitor live video images and search recorded video using iPhone, iPad, Android phone and Android tablet PC anytime from virtually anywhere.

KEY FEATURES

- Supports Android, iOS
- Supports 16 divided screen surveillance
- Controls PTZ, colour, alarm out feature
- Supports playback recorded video
- Supports easy connection to dynamic IP device through FEN Service
- Supports Push Notifications

NETWORK ACCESSORIES

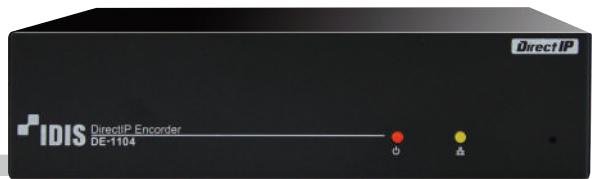

Complete accessory line up
that compliments the IDIS IP surveillance system

By providing various DirectIP™ attachments and accessories, customers can minimise expensive training requirements and save on installation time. Quick, convenient and affordable implementation of DirectIP™ based network surveillance solutions is enabled through the range of network attachments and accessories including PoE injectors, IP to fiber optic converters, SFP modules, eSATA storage devices, remote controllers and so on. With our video encoder, users can connect conventional analogue cameras to DirectIP™ NVRs. This enables the easy integration of existing analogue systems that are seen as one complete system, ensuring full flexibility for all types of applications.

DirectIP™ 4 Channel Encoder

DE-1104

KEY FEATURES

- Specialised in DirectIP™ NVR
- Supports PTZ with RS485 port
- Supports 4 audio input ports
- Supports quadruple stream
- Supports 4 analogue camera input ports

Network Keyboard

NK-1100

KEY FEATURES

- Remote control of NVRs, DVRs, network video transmitters, network video receivers and network cameras via network connection
- Control of NVRs by using a USB mouse via network connection
- Two-way audio communication
- Convenient firmware upgrades via either the USB port or ethernet
- Firmware duplication and auto-recovery functions to enhance system stability
- Management of multiple network keyboards via network connection
- Programmable by using the LCD screen
